SOURCE: [REDACTED] 25X1X

1. On 22 November and 1 December 1951, about 35 single-engine aircraft, including some with red propeller hubs, were observed parked on the eastern and north-eastern edges of Brandenburg-Arado airfield.

2. On 6 and 13 December, the occupation at the field was the same as on 1 December. All planes were covered with tarpaulins therefore no numbers could be observed. On 13 December, a plane fitted with an in-line engine and a long cockpit circled the field. A twin-engine Li-2 repeatedly took off and landed at the field.

3. A fuel dump, about 100 meters square, was located about 300 meters north of Neuendorf. * The fuel containers which were not interconnected were fitted with screw lids without gaskets. A guard detail was quartered in a small shed inside the dump.

4. On 27 December, 36 ground attack planes and 4 biplanes were parked at the field. 25X1B

25X1A

* [REDACTED] Comment. For location of fuel dump and disposition of the 11 underground fuel containers, see Annex.

** [REDACTED] Comment. The field is still occupied by a ground attack regiment which was repeatedly confirmed by another source in December 1951.
